## THE ABILITIES

**ROCK:** You are small and heavy, you can roll in caves, break through hanging bridges or sink faster underwater. Rock n Roll!

**BURN:** You can burn the moving grass (which is placed all over the game world). Those burning bushes can be used as a trap for the enemies. In combination with the ability "float" you can also fly up a bit on the smoke of the burning grass!

**EVEN FLOW:** You are now able to float! This will be important to drift to distant places or glide down slowly in a spiky cave!

**ELEVATION:** Of course! The game is set in 1977. So there **MUST** be something like telekinesis! Choose this ability and make objects float in all directions! (Press "d" and use the arrow keys to let different dynamic items float)!

**SPEED OF LIGHT:** Run faster. Jump higher (just hold the "d" Key). Be superman like! I wonder where you will find this Ability...

## THE ENERGY BAR

The energy bar tells you how strong you are and how long you'll be able to use your abilities. It recharges over time - or course you can speed things up a little...

## ESHERS

Each of these paradox upgrades will make you and your abilities a little stronger. Collect a couple of Eshers to upgrade your energy bar!

## OPTIONS

You'll be able to save your game from time to time. You can always continue your game at your last saved position. Starting a NEW ADVENTURE however will delete your saved game!

Pitiri 1977 can be played in WINDOWED and FULLSCREEN mode.

And most important: HAVE FUN!
